about us

HIVAD HONAR Porcelain Tile and Ceramic Industries Company was put into operation in 2021 in order to produce quality products using the latest methods and machines in the world, with the aim of exporting to countries such as the United Arab Emirates, Qatar and European countries, as well as attracting domestic markets. This company has helped a lot to the ceramic tile industry in Iran in line with creating a very high entrepreneurship and also a significant foreign exchange.

The machinery of the complex, which is located in an area of 25,000 square meters, is one of the most up-to-date machines in the world, which is among the finest in the country, and it will be able to produce polished and Nano porcelain slabs in very large sizes. It will be worth mentioning that Italian-Spanish-Chinese-Turkish forces and technicians as well as Indian workforces have been used to launch the complex in order to produce the best possible product to compete with other companies' products in the competitive market. It is not without merit to say that this complex has been constructed with an investment of 800 billion Tomans in one of the most deprived parts of the country in order to distribute facilities equally in the country and provide the facilities for employment of about 500 young people in our country. So that it provided an important step towards eliminating deprivation and developing this industry in this deprived area.
